

### **3) Simon Tewolde (Mr)**

Born in 1983, in Asmara, Eritrea. I did my master degree study in the Faculty of civil engineering at Bauhaus University Weimar, Germany. Currently working as a civil engineer at airwerk GmbH and at the same time as a research assistant and PhD researcher at Ruhr University Bochum (working group: Wind engineering and flow mechanics). My research focus is on Reliability of large offshore wind turbine support structures from structural health monitoring data.

My interest and followup of WINERCOST activities started after my participation in the WINERCOST's training school (Advances in Wind Energy Technology) in Malta and decided to participate in this competition to somehow make some memorable contribution.
