## Research Forum

### Collaborative Research Discussion Forum

**Scope:** The aim of the forum is to discuss the main developments in off-shore and on-shore wind energy technology and innovation and developments in the field. The aim is also to address the limitations and opportunities of small scale and built environment wind energy technology. The discussion shall address Loading limits, modelling issues, social acceptance and environmental issues.

The sessions shall be inter-disciplinary and shall cross boundaries between the three work groups. The discussion shall set the scene for stakeholder input and exchange with industry in future activity.

**Dates:** The sessions shall be held on Wednesday 27<sup>th</sup> and Friday 29<sup>th</sup> May 2015.

**Deliverables of the TS:** Four Abstracts concerning Interdisciplinary collaborative research.
